Career Objective

Detail-oriented Computer Science Engineering student seeking an entry-level **Software Testing / QA** role. Strong foundation in manual testing, basic automation using Java and Selenium, SQL, and test case design. Eager to contribute to enhancing software quality, reliability, and user experience through effective testing practices.

Technical Skills

Programming Languages: Java, Python

Software Testing: Manual Testing, Automation Testing (Java, Selenium – Basic), Test Case Design & Execution, Bug Tracking & Reporting, SDLC, STLC

Database: MySQL, SQL Queries

Web Technologies: HTML, CSS (Basic)

Tools & Platforms: Git, Arduino

Education

Bachelor of Engineering (B.E.) in Computer Science and Engineering

Visvesvaraya Technological University (VTU)

CGPA: 8.0

2022 – 2026

Project

IoT-Based Smart Horticulture System

- Developed an IoT-based system using Arduino for automated plant monitoring.
- Implemented real-time monitoring of soil moisture levels and water usage.
- Improved operational efficiency through automation and alert-based mechanisms.

Testing Knowledge

SDLC & STLC, Test Case Writing, Functional Testing, Regression Testing, Defect Tracking and Reporting

Soft Skills

Problem Solving, Teamwork, Communication, Adaptability, Logical and Analytical Thinking

Languages

Kannada, English, Telugu, Hindi
